SUMMARY

EDUCATION

University of Transport And Communications (UTC)

Cau Giay, Ha Noi

Bachelor of Information Technology. GPA : 3.93/4.0

Expected: 06/2027

Achievements and Honors:

- Received the Excellent Study Scholarship for 5 consecutive semesters.
- Earned the “Algorithm and Application Program” Certification from Samsung R&D Vietnam.

PROJECT

Battleship Online

Fullstack Developer | Team size: 3

03/2026 – 04/2026

Github: [battleship-game](#)

Tech stack: TypeScript, React, TailwindCSS, Framer Motion, NestJS, PostgreSQL, Cloudinary

- Authored 20,000+ lines of TypeScript and 20+ reusable animation modules in React/Framer Motion, enabling rapid feature iteration and decreasing UI development time
- Developed game AI for solo mode by implementing the Minimax algorithm with Alpha-Beta pruning to optimize bot decision-making with approximately 70% win
- Integrated an ELO-based ranking system and dynamic leaderboard to accurately track and display player statistics and performance
- Established an Admin dashboard equipped with real-time user monitoring and moderation tools to track, kick and ban players

LTG – Leetcode to Github (Web Extension)

Solo Developer

02/2026 – 03/2026

Github: [leetcode-to-github](#)

Tech stack: HTML, CSS, JavaScript, Manifest V3, Chrome Storage API, GitHub REST API, GitHub

OAuth

- Engineered a browser extension that automatically syncs accepted LeetCode submissions to a selected GitHub repository.
- Configured GitHub OAuth authentication flow for secure repository access.
- Designed extension state management with Chrome Storage API for user settings and tokens.

Exam Computer Monitoring

Fullstack Developer | Team size: 4

09/2025 – 11/2025

Github: [computer-monitoring](#)

Tech stack: TypeScript, React, TailwindCSS, Winforms (AntD), ASP.NET Core, PostgreSQL

- Contributed to a 3-tier monitoring system (Windows App, Web Dashboard, Server)
- Implemented server-side logic to log active processes, detect restricted applications, and execute remote

termination commands

- Constructed the web-based monitoring dashboard to support tracking multiple devices simultaneously with near real-time UI updates

LEADERSHIP & ACTIVITIES

SFIT – Câu lạc bộ Tin học

Leader of Web Department

2024 – Present

- Led the Web Department, coordinating technical projects and earned the “Active Member” Certification for 4 consecutive semesters
- Architected and launched the club’s official landing page at sfit.com.vn.
- Mentored 10+ junior members by preparing reports, designing starter templates, and organizing mock tests and training sessions on web development.

SKILLS

- **Programming Languages:** JavaScript, TypeScript, C++
- **Frontend:** HTML, CSS, React, Next.js
- **Backend & Database:** Node.js, Express.js, NestJS, PostgreSQL, MySQL, MongoDB
- **Tools & DevOps:** Git/GitHub, Postman, Linux (Basic), Docker (Basic)
- **Languages:** English (Advanced Technical Reading, Conversational Speaking/Writing)
